Art Unit: 1625

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The invention employs a novel strain of *Aspergillus* sp. to obtain a specific product. Applicants have deposited the organism as explained on p. 11 of the specification. The information given therein is lacking in that it must be averred that the deposited material has been accepted for deposit under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the purpose of Patent Procedure (e.g. see 961 OG21,1977) and that all restrictions on the availability to the public of the material so deposited will be irrevocably removed upon the granting of a patent. MPEP 2403.

Applicants should limit "microorganism" in claim 10 to the specific *Aspergillus* sp. organism, i.e. " *Aspergillus* sp. F-1491 (FERM BP-8288) or one of its variants and/or mutants" because this is what is enabled in the specification.

In claim 11 "An" should be replaced by "A biologically pure culture of a" etc.
